PROFESSIONAL SUMMARY

BCA graduate (2026) pursuing an M.Sc. in Data Science, seeking an entry-level role as an AI Application Developer, ML Engineer, GenAI Developer or Prompt Engineer. Built 8 full-stack AI/ML projects using Google Gemini, TensorFlow/Keras, RAG pipelines (FAISS) and Scikit-learn, with Flask backends and responsive front ends. Top performer (96%) in Internshala's Machine Learning with AI certification. Uses AI coding tools (Copilot, Claude, ChatGPT, Gemini) daily for fast, AI-assisted development.

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL, HTML5, CSS3

GenAI & LLMs: Google Gemini API, Retrieval-Augmented Generation (RAG), FAISS, Embeddings, Prompt Engineering, REST API

ML / Deep Learning: TensorFlow, Keras, Scikit-learn, NumPy, Pandas, OpenCV, Grad-CAM (Explainable AI)

Web & Databases: Flask, Flask-Login, SQLAlchemy, Bootstrap, Tailwind CSS, SQLite, MySQL, PostgreSQL

Tools: Git, GitHub, Render, VS Code, PyCharm, GitHub Copilot, Claude, ChatGPT, Gemini, Antigravity

KEY PROJECTS

College Notes RAG Chatbot — AI Study Assistant 2026

Tech: *Python, Flask, Google Gemini API, FAISS, PyMuPDF, PostgreSQL/SQLite*

- Built a Retrieval-Augmented Generation system where students upload PDF notes and get context-aware answers from Gemini, using PyMuPDF chunking and Gemini embeddings indexed in FAISS, with a TF-IDF fallback.
- Implemented per-user document isolation, role-based admin dashboards and Flask-Login authentication; designed to scale from SQLite to PostgreSQL on Render.

MedVisionAI — AI Skin Disease Detection System 2026

Tech: *Python, Flask, TensorFlow/Keras, OpenCV, Grad-CAM, SQLite*

- Built a CNN with TensorFlow/Keras that classifies skin diseases from images with confidence scores and Grad-CAM heatmaps highlighting the affected regions (explainable AI).
- Added automated PDF medical reports, prediction history tracking, user authentication and an admin panel.

Other Projects

- **AI Resume Analyzer** (Flask, Gemini API, PyPDF2): ATS scoring, job-description matching and AI-powered resume rewriting.
- **AI Crop Advisor Chatbot** (Flask, Gemini API): multilingual farming chatbot with weather API integration.
- **Crop Yield Prediction & Recommendation System** (Flask, Scikit-learn, Gemini API): regression model paired with AI-generated farming recommendations.
- **Property Price Prediction System** (Flask, Scikit-learn, SQLite): ML regression model with automated PDF reports and an admin dashboard.
- **Student Accommodation Management System** (Flask, SQLite): full-stack platform for listing, searching and managing student housing.
- **Business Workflow Automation** (Flask, JavaScript): operational dashboard with real-time attendance tracking, automated leave management and employee activity monitoring.

EDUCATION

Master of Science (M.Sc.) in Data Science 2026 – Present
Chandigarh University (Online)

Bachelor of Computer Applications (BCA) 2023 – 2026
St. Anne's Degree College, Virajpet – Kodagu University

CERTIFICATIONS

- **Machine Learning with AI** — Internshala (2026), 96%, Top Performer
- **Data Science with AI** — Internshala (2025), 78%; **Web Development** — Internshala (2025)
- **Generative AI Foundation** — upGrad (2026); **Deep Learning for Developers** — Infosys Springboard (2026)
- **Forage Job Simulations (2026)** — Data Analytics; Software Engineering; GenAI-Powered Data Analytics
